WEBSITES

<http://www.nlm.nih.gov/medlineplus/ency/article/002456.htm>

Excellent website from the U.S. National Library of Medicine and National Institutes of Health. Provides information on a child's growth and development for infancy, preschool years, middle childhood years, and adolescences. Text available in Spanish.

<http://kidshealth.org/parent/growth/>

Easy to use website with information on a child's changing body and mind from infancy through teen years. Covers growth and development, emotions and behavior, infections, and nutrition. Text available in Spanish.

<http://www.parents.com/baby/development/growth/>

Good month-by-month coverage of the milestones of development from *Parents* magazine.

<http://www.extension.purdue.edu/providerparent/child%20growth-development/main-cgd.htm>

Very good resource for providers working with parents. The focus is on the responsibilities of providers for the growth and development of the children in their care. Some of the topics covered are parent-provider relationships, child growth & development, children & learning, and health & safety.

<http://www.nea.org/home/31627.htm>

The online resources in this list provide information and research on cognition and brain development. They discuss implications for parenting and programming and offer ideas for creating policies for the early care and education of children.

<http://redleafpressblog.org/?s=brain+development>

Redleaf Press has several blog posts with insights into brain growth and development in young children as well as ideas to promote healthy growth.

<http://www.thinksmallblog.org/?tag=brain-development>

Think Small's very own blog offers articles highlighting research on brain development in young children. One post focuses on the impact that poverty has on brain development in young children.
